In 1944, one dropped came, that they wanted some supply people to reach Kohima. The Japanese were all round in Kohima, in the park and they have circled our two divisions. One Indian division, one British division. There was one British lieutenant. He came to us and he told that you were in the theatre of war. We were laughing in the theatre. The theatre, we were thinking that theatre was some film or something. So, then after that, when we laughed, he told us to defeat them. So, he gave us a lecture like that. I stood up and told that we, six, we, we don't afraid of fighting. First, they have to liberate those two divisions who were circled. The Japanese airplanes, they were coming, circling and throwing those bonds out and going back.

When I left army, they were giving me jobs, making baskets or something like that. I told them that I was in the army, Sergeant-Major and I was getting good money.
